### **DETAILED ACTION**

This Office Action is in response to the Transmittal of New Application filed on June 26, 2003.

#### ***Status of Claims***

Claims 1-6 are pending.

#### ***Priority***

1. This application appears to be a division of Application No. 10/140,536, filed May 7, 2002. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." The divisional application should set forth the portion of the earlier disclosure that is germane to the invention as claimed in the divisional application.

#### ***Allowable Subject Matter***

2. Claims 1-6 are allowed.
3. The following is an examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest, in combination with the other claimed features, first and second movable surface water vapor condensation traps that accumulate byproduct water vapor on first or second cooled surfaces of the movable water vapor condensation traps interior to a wafer processing chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,426,865 to Ikeda et al. teaches placing a cooling plate in a load lock chamber to cold trap water vapor but fails to teach first and second movable surface water vapor condensation traps that accumulate byproduct water vapor on first or second cooled surfaces of the movable water vapor condensation traps interior to a wafer processing chamber.

US 5,582,017 to Noji et al. teaches a cold trap within a chamber for condensing water vapor but fails to teach first and second movable surface water vapor condensation traps that accumulate byproduct water vapor on first or second cooled surfaces of the movable water vapor condensation traps interior to a wafer processing chamber.

US 2002/0056311 to Nomura et al. teaches a vapor trap with movable trap units that are regenerated but fails to teach first and second movable surface water vapor condensation traps that accumulate byproduct water vapor on first or second cooled surfaces of the movable water vapor condensation traps interior to a wafer processing chamber.
